

I Will Never Leave You

The thought of lovin' someone scared me
Gettin' close filled me with fear
This is a different kind of feeling
that comes on me everytime you're near

Could it be that you're beautiful
or that starlight in your eyes
This must be what happens when you fall in love
The ground is far below you and you're somewhere in the sky

chorus:

**I will never leave you
Hurt you or deceive you
I will be straight and solid 'til the end of time
I'll keep my word of honor
come sunshine, rain or thunder
Nothing's strong enough to change my mind
I will never leave you, You are mine**

I know all you've heard about me
Most of it ain't too good
I could lie and say it's crazy
But this time I don't think I should

Something's happening and it's really strange
I got this pulling on my heart
Like my whole life is about to change
If it's lovin' you forever, I can't wait for it to start

repeat chorus twice

I will never leave you, You are mine
